

AMR-Nexus — Clinical Summary

Generated 2026-10-04 07:39 UTC · by admin@amrnexus.com

Record ID: 88330de1-d665-45d6-9ad4-1e22b4ec3057	Not MDR
MDR probability: 18.8%	Model: 1.1.0

Isolate

Pathogen	Klebsiella pneumoniae
Sector	human
Sub-sector	hospital
Species	—
Specimen	blood
Antibiotic class	Carbapenem
Test method	Disk diffusion
SIR result	—
Collection date	2026-09-15

Location

County	Nairobi
Sub-county	Kasarani
Urban/rural	—
Site ID	—

Patient context

Age	—
Sex	—
Ward type	—
Infection origin	—
Prior antibiotic exposure	No

Prediction and explanation

MDR probability	18.8%
Anomaly	Yes
Model version	1.1.0
Top contributing feature	sector_sub_pair_count
Feature contribution	-0.712

sector_sub_pair_count decreases risk by 0.712.

Clinical interpretation

Observed resistance rates from isolate records. Not a prediction: this is what the platform's own data shows for the last 180 days.

Primary recommendation: Fluoroquinolone

Antibiotic class	AWaRe	Samples	Resistance
Fluoroquinolone *	Unclassified	7	0.0%
Tetracycline *	Unclassified	5	0.0%
Carbapenem	Unclassified	180	2.8%
Aminoglycoside	Unclassified	10	30.0%
Cephalosporin	Unclassified	12	41.7%
Penicillin	Unclassified	10	50.0%

* fewer than 10 samples — treat resistance estimate with caution.

Ranking prefers lower resistance, then higher sample count, then Access drugs over Watch over Reserve, per WHO AWaRe 2023.

This summary is generated by AMR-Nexus from submitted isolate data. It is a decision-support aid, not a substitute for clinical judgement. Confirm any treatment decision against local laboratory results and national guidance.
